CAMBRIDGE, MASSACHUSETTS 02138

OFFICE OF THE DEAN

79 JOHN F. KENNEDY STREET

November 14, 1987

Dr. Robert Gates
Deputy Director of Central
Intelligence
Washington, DC 20505

Dear Dr. Gates:

Enclosed is an announcement of the 1989-90 fellowship program in international security studies sponsored by the Center for Science and International Affairs (CSIA).

CSIA welcomes applications from university faculty members, recent recipients of the Ph.D. degree or its equivalent, and employees on sabbatical leave from governmental organizations, particularly those whose agency is willing to provide partial or full financial support. The Center also awards fellowships to a select group of doctoral degree candidates. Recipients of other fellowships are encouraged to apply for affiliation with CSIA.

Fellows work with the directing staff on both individual and collaborative projects. The Center promotes an interdisciplinary approach to its research and has a special, but by no means exclusive, interest in the role of science and technology in the analysis of international security issues.

Collaborative work at CSIA during the 1989-90 academic year will include research on strategic offensive and defensive forces, the development and operation of nuclear forces, conventional defense issues, military strategy, arms control, prevention of superpower crises, Soviet and other regional security issues, and economic and technological aspects of security.

Appointments are for the academic year. Application procedures and financial information are described in the announcement. Applications must be received by February 28, 1989. Award decisions will be announced by April 15, 1988. We would appreciate your bringing this program to the attention of appropriate candidates. Thank you for your interest and assistance.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "KMC", with a stylized flourish at the end.

Kurt M. Campbell
Assistant Director, CSIA
